

# PORIFIX® »Chimney for condensing boilers«

System lightweight shaft L<sub>A</sub> 90 210x210 mm/ Ø 130 mm - comprising flue pipe D80 PPs

## Order/enquiry form 2021

### Description and brief explanation:

The overview diagram to the right shows the assembled structure of the **PORIFIX®** lightweight shaft. The shaft comprises the following components:

- 1 Shaft element 500 mm containing integral PPs flue pipe D80 incl. spacer PP
- 2 Basic package comprising:
  - 1 pc. Ceiling connection element D80/125
  - 1 pc. Roof terminal terracotta or black
  - 1 pc. Pitched roof tile, adjustable 25–45° roof pitch (other inclinations on request) or Flat roof collar
  - 1 pc. Bag special adhesive (12 kg)
  - 4 pc. support brackets with insulation insert

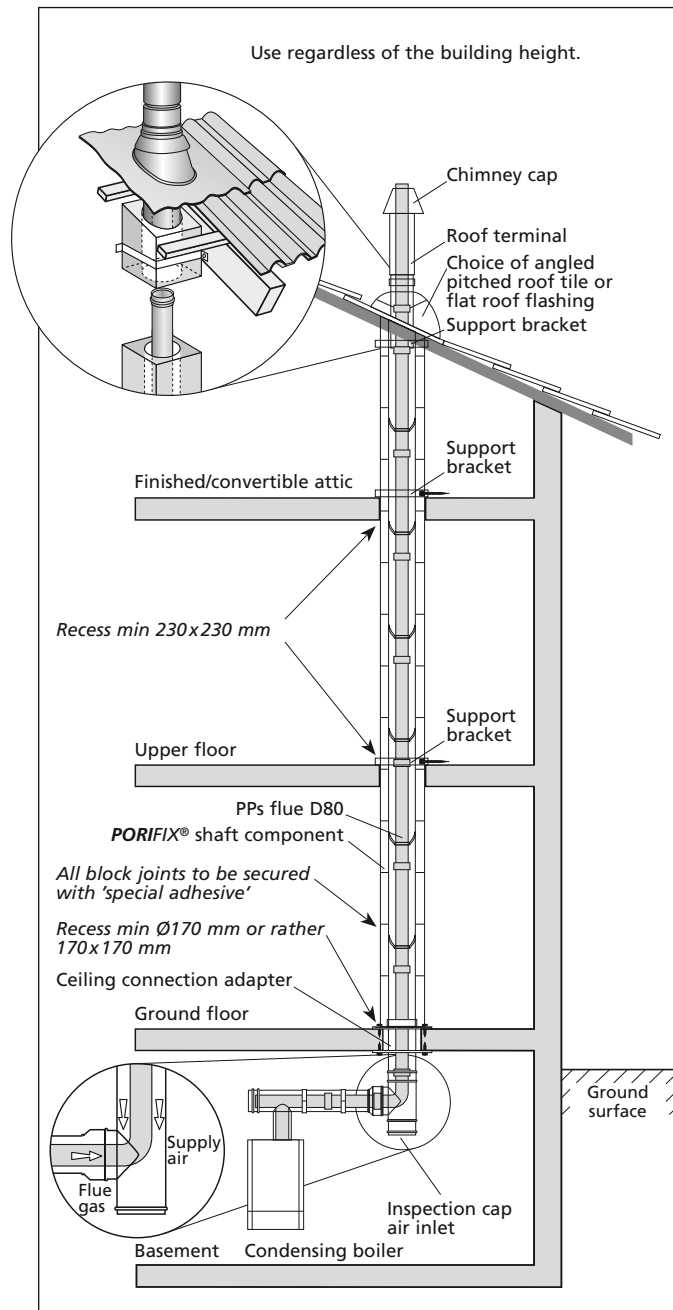

The shaft blocks are 0.5 m in length and contain flue pipe and spacer. The quantity of shaft elements required is determined by the length of the shaft starting at the ceiling above the heating appliance and extending to the roofing panel

For the shaft construction you need a basic package **2**. Please observe the several variants for pitched roof, 'flat roof, different heights above roof and colours terracotta and black.

The support brackets must be fixed in position in the area above the ceiling openings (except in the first ceiling above the heating appliance) and to the roof rafters at the uppermost position. The number of support brackets required corresponds to the number of floors above the heating appliance.

### Delivery conditions

The prices are given per unit exclusive of local value-added tax and delivery costs. Non-exchanged EURO DIN pallets will be calculated at 13 EUR. We will deliver to an accessible unloading point. Unloading is not included. The customer must assume responsibility for unloading the goods.

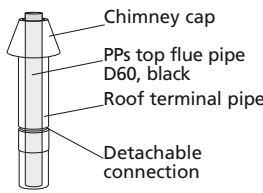

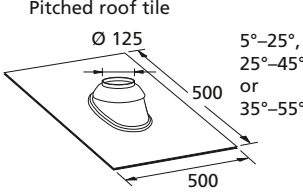

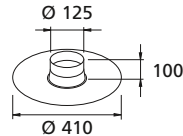

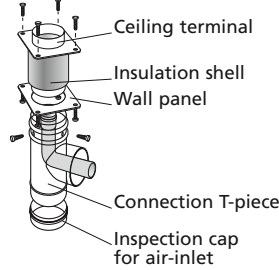

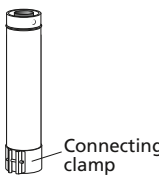

Latest revision: January 2021 (Subject to technical changes)
